#### STATE OF HAWAII

#### DEPARTMENT OF HAWAIIAN HOME LANDS

#### March 21, 2016

TO: Chairman and Members, Hawaiian Homes Commission

FROM: Hokulei Lindsey, Administrative Rules Officer

Office of the Chairman

SUBJECT: Beneficiary Consultation Report on Department of

Hawaiian Home Lands Proposed Amendments to Title 10,

Hawaii Administrative Rules

#### RECOMMENDED MOTION/ACTION

None. For information only.

#### DISCUSSION:

Pursuant to Hawaii Revised Statutes section 91-5, each agency is required to adopt and maintain administrative rules; "[c]ompilations shall be supplemented as often as necessary and shall be revised at least once every ten years." In accordance with the Administrative Rules Development, Review, and Amendment Process adopted by the Hawaiian Homes Commission in July 2015, the Department of Hawaiian Home Lands conducts Beneficiary Consultation before initiating rulemaking under Ch.91, HRS.

At its September 2015 meeting, the HHC approved the DHHL's request to proceed with beneficiary consultation regarding proposed amendments to Title 10, Hawaii Administrative Rules. The proposed rule changes cover three main topic areas: Genetic Testing, Subsistence Agriculture, and the Transfer of Homestead Leases, as well as some "Housekeeping" amendments that deal primarily with administrative efficiencies and updates. From October 27, 2015 to December 10, 2015 the DHHL conducted statewide beneficiary consultation meetings to discuss with and get feedback from beneficiaries about the proposed rule amendments.

Summary of Beneficiary Consultation Process

Haw, Rev. Stat. §91-5.

The Department mailed meeting notifications to all lessees and everyone on the waitlists with a valid mailing address on file; a total of 24,439 postcards were mailed, letters were sent to beneficiaries on Lana'i (see Exhibits A and B). In all, ten consultation meetings were held and over 700 beneficiaries attended. The chart below shows the meeting date and location, and the number of attendees that signed-in:

MEETING DATE	COMMUNITY	ATTENDEES SIGNED-IN
Oct. 27, 2015	Lana'i	18
Nov. 2, 2015	Nanakuli, Oʻahu	119
Nov. 9, 2015	Waimea, Hawai'i	78
Nov. 10, 2015	Keaukaha, Hawai'i	81
Nov. 23, 2015	Kaua 'i	29
Nov. 24, 2015	Papakolea, O'ahu	34
Nov. 30, 2015	Maui	87
Dec. 1, 2015	Moloka'i	51
Dec. 7, 2015	Kapolei, O'ahu	65
Dec. 10, 2015	Waimanalo, O'ahu	170

At each meeting, a powerpoint presentation was used to provide information about administrative rulemaking and to introduce major topic area, copies of the presentation distributed at the sign-in table (see Exhibit C). Also available for examination was a poster-sized chart detailing the "Housekeeping" proposals, and four binders with the full text of the proposed amendments. Beneficiaries could comment on the "Housekeeping" proposals by affixing post-it notes to the poster-sized chart. Following the presentation by staff, attendees gathered in three randomly assigned breakout groups facilitated discussion about each of the major topics proposed for amendment (see Exhibit D). A minimum of two staff for each topic area rotated in twenty-minute intervals to each breakout group. Each breakout group, therefore, had at least twenty minutes of discussion dedicated to each topic area. Staff took detailed notes during these discussions; the notes taken comprise the bulk of the record of comments received at the meetings (see Exhibit E).

The format used at the consultation meetings was designed to solicit beneficiary input through facilitated conversation focusing on how the proposed amendments could be made better. The Department posed three questions per topic area to help initiate conversation and highlight issues from the Department's perspective. These questions are reproduced in the section that follows below exactly as they were posed at the meetings. Beneficiaries were also encouraged to share their thoughts about

the proposals, whether in response to the Department's questions or not.

The Department also created a webpage dedicated to the rules process (<a href="http://dhhl.hawaii.gov/dhhlrules/">http://dhhl.hawaii.gov/dhhlrules/</a>) for those beneficiaries that could not attend the meetings or who wanted to access information independently. The information posted on that page includes: streaming videos from Chairman Masagatani and staff; the meeting schedule; the text of the proposed rule changes; the powerpoint presentation; frequently asked questions; the "Housekeeping" proposals and a chart of potential impacts; HHC submittals; and the current version of Title 10, HAR.2 The page was shared 400 times on Facebook.

In addition to comments collected in the breakout groups at the meetings, beneficiaries were encouraged to submit written comments using green comment sheets provided at the meetings, an online form available at the rules webpage, email, or mail. Fifty-one comments were received on the green comment sheets at the meetings. The period to submit written comments closed on January 11 2016, one month after the last meeting was held. Eighteen beneficiaries used the online form to submit comments and one commented by mail.<sup>3</sup>

#### Summary of Beneficiary Comments and Staff Responses

This section reports summary comments from Exhibit E, which provides the complete record of comments received from:

- a. Discussion notes which identify beneficiary comments from each of the Beneficiary Consultation meetings held statewide from October 27, 2015 to December 10, 2015;
- b. Green comment sheets which provide personalized beneficiary comments from each of the Beneficiary Consultation meetings held statewide from October 27, 2015 to December 10, 2015; and
- c. Written comments received via email online form or mail from beneficiaries who chose to utilize those opportunities.

To analyze the comments received, staff began with responses to the questions asked by the Department then staff identified additional prominent themes that were beneficiary driven rather

The webpage will be updated as the rulemaking process moves forward.

<sup>&</sup>lt;sup>3</sup> The Department also received six questions or requests for information by phone.

than specifically prompted by the Department. As a result, the summary beneficiary comments reported below are both quantitative and qualitative in nature; some comments are easily counted as relating to a specific question while others more naturally provide greater thematic context and explanation.

#### Genetic Testing

Under the proposal, test results would be accepted to establish parent-child biologic relationships. Testing would be available as a final option if after the standard application process questions regarding parentage, which could establish blood quantum remain. Testing would be voluntary and at the applicant's expense. Testing utilized must have a power of exclusion of greater than 99.0% and a minimum combined maternity or paternity index of 500:1.

Why should it be limited to parent-child? Or why should it be broader, like aunts and uncles?

- Beneficiary comments: There was overwhelming support for expanding beyond parent-child relationships, especially if it would help people qualify. The common reasoning was that if an applicant's alleged parent was deceased, there may be a surviving sibling or other relative who could be tested.
- Response: Further research is required. Under the HHCA, the Commission and the Department must ensure applicants are at least 50% native Hawaiian to qualify as lessees. Although one of the reasons for accepting genetic test results is to help more applicants qualify, a balance must be struck whereby a sufficient level of confidence can be placed in the certainty of the test results.

How sure/positive should the results be?

- Beneficiary comments: While some comments were supportive of the proposed standard and others suggested raising or lowering the threshold, consensus seemed to be that they could not opine without knowing more about the process and meaning of the results. A consistent theme, however, related to how expanding the types of relationships tested would impact the degree of certainty expressed by the test results.
- Response: This issue is directly related to the previous question. The impact of expanding the relationships tested on the degree of certainty expressed by test results requires additional due diligence on the part of the DHHL.

How do you feel about this from a cultural perspective?

- Beneficiary comments: There was general consensus that undergoing genetic testing is a personal and individual choice. Related to Question 1 above, there was some discussion about testing if the alleged parent was deceased.
- Response: Testing would not be required under the proposed rule; whether to pursue genetic testing would be the applicant's choice. The draft language makes testing available as an option if standard documentation fails to verify at least 50% native Hawaiian ancestry. With regard to testing alleged parents that are deceased, staff can gather additional information to ascertain its feasibility.

#### Beneficiary Generated Themes:

Blood quantum testing.

- Beneficiary comments: A significant number of questions arose about testing for blood quantum or ethnicity. Suggestions related to terminology and using language more relatable like "ohana" or "paternity" or "DNA" testing.
- Response: For clarification of terminology, staff agrees and recommends adding "ohana testing" to the definition of "genetic testing." The proposed rule does not include testing for ethnicity or blood quantum. The exact allele frequencies of the native Hawaiian population are not published so a reliable determination of native Hawaiian ethnicity is not possible. Moreover, the proposal was drafted as a conservative first step using established and familiar standards under existing Hawai'i law for parent-child testing.

Cost of testing.

- Beneficiary comments: DHHL should pay the costs associated with testing.
- Response: While staff understands that cost can be a concern, the applicant is responsible for any costs or fees associated with the application process. The DHHL does not subsidize current costs and should not pay for an applicant to undergo genetic testing.

#### Privacy.

• Beneficiary comments: Two themes were raised related to privacy. One was the protection and confidentiality of the information. The other related to the use of test results to "disqualify" or "revoke" a previously issued lease.

• Response: State law provides that an individual has a significant privacy interest in information relating to "medical, psychiatric, or psychological history, diagnosis, condition, treatment, or evaluation."<sup>4</sup> The test results submitted to the Department likely would be protected as a significant privacy interest of the applicant and alleged parent. Additional language can be included in the proposal to specifically provide that the DHHL shall not disclose the information without prior consent. A form and process can also be developed so the applicant and alleged parent can consent to disclosure or use of the information, if they choose.

In terms of test results being used to disqualify a lessee post-award, the Department reviews the native Hawaiian qualification as part of the award process.

#### Subsistence Agriculture

The proposal would create a specific agriculture award of one acre or less where the lessee would be required to reside on the lot. Programmatically known as the "subsistence ag" lot, these awards are intended as rural lifestyle lots where the lessee can grow a vegetable garden and fruits, and raise small animals as a food source for the lessee and family. Unlike an agriculture award of larger acreage, a farm plan and two-thirds cultivation would not be required.

How much acreage is enough to do subsistence farming and why?

- Beneficiary comments: Beneficiaries thought subsistence agriculture lots should be bigger than one acre. Comments also proposed allowing flexibility in acreage awarded depending upon island, area, and/or family size.
- Response: The one-acre lot size was proposed subsistence agriculture use because one acre is generally within the size lot the various counties consider to be Maintaining some consistency with the counties ultimately makes development and permitting easier. strong theme in the consultation data was the desire to have family live on the same lot. It is reasonable to conclude that the push for a larger lot size is linked to the ability to subdivide rather than an actual link to the ability to engage in subsistence gardening. A one-acre lot is large enough to support two dwellings and subsistence activity. Language can be added to the proposal that would

<sup>4</sup> See Haw. Rev. Stat. § 92F-14(b).

<sup>&</sup>lt;sup>5</sup> See Haw. Rev. Stat. § 205-2(a)(2), (c).

allow more than one dwelling unit on the subsistence agriculture lot.

What do we mean by "subsistence"?

- Beneficiary comments: Responses ranged from farming as a business for income to an off-grid lifestyle but most thought "subsistence" meant to grow your own food and maybe sell any extra. Thematically, enforcement was a concern given that there is little enforcement on agriculture lots. Comments also expressed that agricultural lands should be used for agricultural purposes.
- Response: Programmatically, defining what is meant by "subsistence" is important. The idea of subsistence as a rural or country lifestyle (something between urban and off-grid) where lessees grow food for their families and can sell any extra or sell value-added products is a way to put agricultural lands into production that is manageable and desirable for a broader pool of beneficiaries, and it fosters a greater level of food security on homestead lands. Staff agrees that enforcement strategies should be explored.

Instead of residency, what other type of use or occupancy could be used as the standard?

- Beneficiary comments: Discussion focused on housing options and affordability with virtually no elaboration on other ways to measure use of a subsistence agriculture lot. Suggestions for housing options included tiny homes, container homes, and owner-builder; the theme was living within one's means and/or living mortgage-free.
- <u>Response</u>: Programmatically, the vision is a return to the land and a rural lifestyle. Housing options which are consistent with this type of living should be explored.

Beneficiary Generated Themes:

Planning and development.

- Beneficiary comments: Beneficiaries want infrastructure; utilities in particular. Within the discussion of utilities, whether water would be domestic or agriculture was prominent, and on there was some concern about the cost of that water meter.
- Response: The rules proposed would create subsistence agriculture by setting a general framework for the program. If the program moves forward (beginning with the adoption of rules), issues related to infrastructure would be better addressed as part of planning and program development

because including these types of details in the rules could result in an unnecessarily rigid framework.

#### Technical assistance.

- Beneficiary comments: Beneficiaries want education opportunities related to farming and how to use the land in a productive and sustainable way.
- Response: Technical assistance is available for agricultural lessees on Hawai'i Island and Molokai. The DHHL is looking at partnering with other organizations to expand technical assistance opportunities.

#### Transfer of Homestead Leases

The proposed amendment would prohibit the sale of undivided interests and leases to lots that are vacant or undeveloped. These types of leases could be transferred by gift or succession, or returned to the DHHL.

What type of "improvement" should qualify for a sale?

- Beneficiary comments: Evidence of use or changes to the land according to lease type were suggested as ways to gauge improvement to the lot. The existence of a permanent structure and evidence (i.e., receipts, photographs) of monetary expenditure or working/clearing the land were thought to be sufficient improvement that would qualify a lease for transfer by sale.
- Response: The concept of progress toward the improvement of the lot as required by the lease is worth considering as a policy benchmark for improvement that would qualify a lease for transfer by sale. However, progress toward improvement should be sustained in such a way as to demonstrate actual intent to develop and use the lot rather than an attempt to create an "improvement trail" for the sole purpose of selling the lease; substance should prevail over form.

If this type of sale is not allowed, who should the lease go to?

• Beneficiary comments: Beneficiaries overwhelmingly thought that instead of selling UIs and leases to undeveloped or vacant lots it should go to someone on the waitlist. Within this response there were two prominent variations: 1. the lessee must transfer to someone already on the waitlist; or 2. the lease should be returned to the DHHL for re-award. Comments also suggested a prioritization of possible transferees, for example: family first, then qualified person of choice already on the waitlist, then return to DHHL for re-award.

 Response: There are three ways by which a lease can be returned to the DHHL: surrender, rescission, or contested case. Each has different consequences for the lessee. The DHHL does not currently assist lessees in identifying potential transferees.

Why should rehabilitation be limited to a return to the land?

- Beneficiary comments: There was broad consensus that a Hawaiian homestead lease is a special benefit and that lessees should not be able to sell leases to vacant or undeveloped lots for profit (see below under "ability to transfer"). There was also a strong sense that one should not be prevented from recouping one's investment. Whether financial gain was included as rehabilitation under the HHCA or whether rehabilitation was only by a return to the land split beneficiary responses.
- Response: The proposal would prohibit the sale of UIs and leases to lots that are vacant or undeveloped. The proposal would not limit or prevent beneficiaries from selling a lease to an improved lot.

Beneficiary Generated Themes:

Ability to transfer.

- Beneficiary comments: As noted above, there was an overwhelming response that there should be no sale when there is no improvement to the lot. Communities with undivided interest leases, however, also tended to express that UIs should remain transferable by sale. There were some comments generally supportive of the ability to sell leases but just as many comments supportive of the concept of "one chance." The one chance concept means that any one person can only have one lease during his or her lifetime. Under such a regime, if a lease is transferred using any method the lessee cannot return to the waitlist or obtain another lease.
- Response: The one chance concept has been around for a number of years. Existing rules allow a "previous lessee" to reapply and be added to the bottom of the waitlist. The current proposal does not address the status of previous lessees.

Although lessees with UI leases may be waiting for the Department to ready the land for residential use, the UI is still a lease that cost a lessee only \$1.00/year for ninety-nine years. Selling a UI lease (or lease to an

<sup>&</sup>lt;sup>6</sup> See HAR \$10-3-23.

undeveloped or vacant lot) for profit realizes a gain without financial investment, and places the transferee at a financial disadvantage that does not exist when a lease is awarded by the Department. The proposal ensures fairness in this regard.

#### Enforcement.

- Beneficiary comment: Beneficiaries noted the lack of consistent enforcement and questioned the ability and likelihood of enforcing a rule that prohibits the sale of empty lots and UIs: how does the Department plan to monitor and enforce?
- Response: Enforcement of a rule like the one proposed needs careful consideration. There are several options that the DHHL could explore for example institute mandatory disclosure instead of voluntary disclosure; DHHL execute all transfers; or require all transfers be done through escrow. It is also possible that with adequate publicity of a rule prohibiting sales of these types of leases, potential purchasers would not proceed and/or would report an attempted sale to the Department.

#### "Housekeeping"

- Beneficiary comments: Comments about the Housekeeping proposals were mostly clarification questions, and a few suggestions were made.
- Response: The Housekeeping proposals deal primarily with general updates and administrative efficiencies intended to streamline certain departmental functions. The DHHL intends to undertake rulemaking on a regular basis; there will be opportunities to make additional changes.

# **DHHL Proposed Rule Changes**

You're invited to attend a Beneficiary Consultation meeting in your community to discuss three important proposed changes to the Department of Hawaiian Home Lands' (DHHL) Administrative Rules. Hawaii Administrative Rules govern operations at the DHHL, and the following proposed changes are in direct response to beneficiary feedback the department received over the years:

#### **GENETIC TESTING**

Proposes DHHL accept DNA tests to establish family ties in order to qualify for the Hawaiian Home Lands program.

#### LEASE TRANSFER

Proposes a process and requirements for transferring a vacant homestead lot (i.e. a lot with no home or other improvements built upon the land).

#### SUBSISTENCE LOTS

Proposes a new option in DHHL's agricultural program that supports a subsistence rural lifestyle.

# Rulemaking Process

## What are Administrative Rules?

- Every State agency has administrative rules.
- Rules govern departmental operations.
- Rules make those operations public.
- DHHL's rules are known as Title 10, Hawaii Administrative Rules.

## Why Amend Administrative Rules?

- Improve service, programs, and operations.
- Rules should be consistent with State law.
- Best practice.

# Proposed Amendments

## **Housekeeping Amendments**

- Changes to help the Department keep a "clean house:"
  - -Grammar and formatting;
  - -Updates;
  - Ease and efficiencies.

## **Housekeeping Amendments**

- Physical addresses and contact information.
- New definitions.
- Duties of the chair.
- Rulemaking procedures.
- Approval for building plans.
- Fees and charges.

## **Background**

- New rule.
- What is the current application process?
  - -Application form;
  - Genealogy records and documentation;
  - Qualification.

## **Background**

- What if you wanted to submit DNA evidence today?
  - -No.

## **Policy Question**

Should genetic test results be accepted as part of the application and verification process for the Hawaiian Homes program?

## Why Genetic Testing

- Yes. Because:
  - Genetic test results could help qualify more native Hawaiians.
  - There is a direct benefit to beneficiaries.
- Genetic testing does not affect how the Department reviews or qualifies an application.

### **How Would The New Rule Work?**

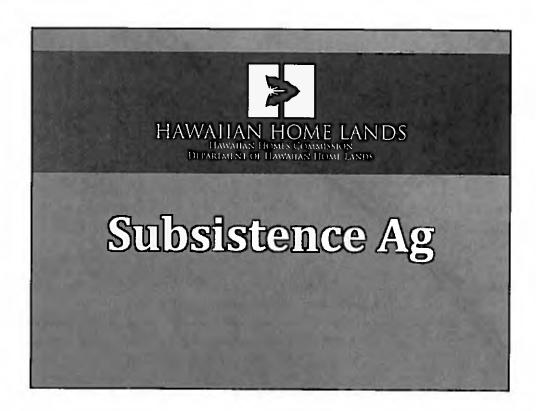

- Only to establish parent-child relationships, not blood quantum;
- After the standard process, applicant can choose testing as a last resort;
- Applicant's expense;
- "Degree of certainty" of the results.

### Your Mana'o

- Why should it be limited to parent-child? Or why should it be broader, like aunts and uncles?
- How sure/positive should the results be?
- How do you feel about this from a cultural perspective?

## **Background**

- Expansion of the ag program that would create a smaller ag lot.
- How do ag awards work today?
  - Typically large acreage, up to 40 acres maximum;
  - Must have a farm plan;
  - Must have 2/3 in active cultivation at all times;
  - Can request additional acreage.

## **Policy Question**

Should the Department expand the agricultural program to create a smaller ag lot and promote self-sufficiency?

## Why Subsistence Ag

- Yes. Because:
  - A lot of beneficiaries are interested in subsistence ag, or a rural lifestyle;
  - The ag list is the longest list on every island except O'ahu;
  - It's a more manageable way to start farming;
  - It can put more beneficiaries on the land.

## **How Would Subsistence Ag Work?**

- Ag lot of 1.0 acre or less for subsistence use;
- Lessee required to reside on the lot;
- Lessee can raise crops and/or small livestock;
- · No ag plan;
- No 2/3 cultivation requirement.

### Your Mana'o

- How much acreage is enough to do subsistence farming and why?
- What do we mean by "subsistence"?
- Instead of residency, what other type of use or occupancy could be used as the standard?

# Transfer of Homestead Leases

## **Background**

- Would restrict the sale of vacant lots and undivided interests.
- How are vacant lots or undivided interests transferred now?
  - Give it away to another beneficiary;
  - Name a qualified successor;
  - Sell to another beneficiary.

## **Policy Question**

Should the Department restrict the sale of leases to lots where a lessee has not made financial investment in its development?

## Why Restrict the Sale of Leases

- Yes. Because:
  - The lessee is attempting to profit from only what the Trust provided;
  - The lessee has not used or invested in a vacant lot or undeveloped lot as required by the lease;
  - The purpose of the Act is to rehabilitate native
     Hawaiians by returning them to the land.

## **How Would the Sale of Leases Change?**

- Applies only to "vacant lots" or "undeveloped lots" and "undivided interests;"
- These types of leases would be transferred only by gift or succession;
- No sale of vacant or undeveloped lots and undivided interests for profit.

### Your Mana'o

- What type of "improvement" should qualify for a sale?
- If this type of sale is not allowed, who should the lease go to?
- Why should rehabilitation be limited to a return to the land?

## **Ground Rules**

## **Ground Rules**

- Be creative!
  - Work toward future solutions/aspirations.
- Conflict is ok as long as we are respectful of each other.
- Silence means agreement.
- Everyone gets a turn first, then repeats.
- Cell phones off or on silent.
  - Take all calls/texting outside.

### **Ground Rules**

- You are personally responsible for:
  - Making sure everyone has equal opportunity to express their ideas;
  - Actively listening;
  - Keeping an open mind and maintaining a positive attitude;
  - Keep side conversations to a minimum.

## **Next Steps for DHHL**

- Review and compile notes from today, as well as additional comments received by January 11, 2016;
- Consider suggested and possible changes;
- Prepare and submit a report for the Commission;
- Submit the proposed amendments to the Commission for approval to move forward with the public hearing process.

## **Next Steps for You**

- Think about today's discussion;
- Talk to family, friends, neighbors;
- Submit comments by January 11, 2016;
- Keep checking the website for updates http://dhhl.hawaii.gov/DHHLRules.

## **How to Submit Comments**

- Green sheets.
- Email: dhhl.rules@hawaiianhomelands.org

#### **AGENDA**

1. Pule, Introductions, Purpose of Meeting — (6:00 p.m.)

To consult with beneficiaries on proposed administrative rule amendments specific to three (3) topic areas and to get feedback on these amendments to better inform the Department and Hawaiian Homes Commission in the amendment process.

- 2. Administrative Rule Amendments Process & Overview (6:15 p.m.)
  - a. Genetic Testing
  - b. Subsistence Ag Lots
  - c. Transfer of Leases
- 3. **Break Out Groups** Various (7:00 p.m.)

There will be three (3) sessions – 20 minutes each- to discuss the three (3) proposed administrative rule amendment topics. Break Out Group facilitators will rotate, so everyone will have an opportunity to share their mana'o.

4. Group Reports, Next Steps & Closing Remarks (8:00 p.m.)

2	Subsistence Ag	3) Subsistence Agricultural Lots - Novel idea! but how will this be monitored , if at all possible?
3	Subsistence Ag	I am a residence Lessee at Kawaihae Mauka and am on the wait list for AG Land. I was hoping AG Land would be available above Kawaihae Mauka, but see it is not eligible for this new ag program due to "no water available". Is it possible to offer AG LANDS on an UNDEVELOPED LAND INITIATIVE - STRICTLY FOR KAWAIHAE MAUKA with those applying agreeing to provide their own WATER CATCHMENT irrigation system; and agreeing to access being limited via JEEP TRAILS? I do believe this is a viable alternative solution to meet the needs foreseen by Prince Kuhio, and hope you will kindly make a provision like this possible.  1. There's a need for create lot sizes to benefit more families on the waiting list, and subsistence
		lots can allow more Hawaiian families the opportunity to receive a Hawaiian Homes award, and also to grow food for their family.  2. In my estimation, less than 2% of DHHL agricultural lots are utilized for commercial agricultural production in Ho'olehua, and even less are fully utilized. Most families lack the knowledge, financing, and business savvy to operate a commercial agricultural operation, and as a result thousands of acres lie unused and tied up in the hands of a few homesteaders when tens of thousands wait for a DHHL lease award. This resource needs to benefit more of those on the waiting list.
		3. Different scenarios and incentives need to be developed to create a fluid transfer of lands while still respecting the original homestead family's needs. Coming up with a new direction and strategy to get more Hawaiian families on the land means thinking outside the box. This could mean buying a homestead lot and sub-dividing it so more families can benefit, and also to provide them with a base to grow food for home use and even roadside sales of their home grown and value-added products. These would be small scale farms of 5 acres or less. Subsistence activities can operate on 1 to 2 acre lots.
		4. Lot dimensions need to be taken into consideration in creating ample space between lots, especially between residences and a template may need to be created. This means creating squarish lots, as opposed to long skinny rectangular lots, where houses are relatively far away from each other to create a rural atmosphere. For example, a 35-acre lot in Hoolehua of 550' X 2771' could produce 16 2-acre lots of 275' X 316.8' with a single 30 foot wide road down the middle of the main lot, OR around 31 1-acre lots of 163' x 267' with two 30 foot wide roads. These kinds of lot configurations will give space between homes, and sufficient area to raise crops.
4	Subsistence Ag	5. The raising of livestock, especially hogs, needs to be reconsidered in these small lots in light of odors and health issues unless strong guidelines are put in place as to how it will be allowed, especially on 1 acre lots, and everyone agrees in this new area OR that lots will be awarded with conditions that allow lessees to raise livestock.  6. Planning around livestock and non-livestock homesteads are a little more complicated. The

6	Subsistence Ag	Subsistence Agriculture Lots also, I add my written response that providing the land with all kinds of conditions to have a background in farming/agriculture or with a college degree is nice for those who can but by the same token what about those who've lived off the land and use what they produce for their own family? Because of my parents that's what they wanted to raise a few poultry, rabbits, chickens, a pig and a turkey. So now, I can use this award to do that but I'm almost 70. I'm glad you're reaching the Hawaiians today who just need to grow their own and sit/lie without being someone's nuisance.
		Subsistence Lots - I do not support DHHL issuing "subsistence ag. leases" that are 1.0 acres or less. In accordance with the HHCA, "not more than one acre of any class of land is to be used as a residence
		lot" Despite surveys indicating the desire for smaller subsistence lots, if DHHL is going to issue lots less than 1 acre for agriculture, I believe it must go through the process of amending the HHCA because 1 acre or less in accordance with the act is considered residential. For many years the State of Hawaii has created administrative rules or
		processes that directly conflict with the HHCA. In this case, the Act clearly states 1 acre or less is residential. Reducing the lot size for ag awards does not address DHHL's failure to issue ag lands. The current barriers to ag. awards were created by the state. The HHCA only requires a lessee to be 18 years of age and meet a 50% blood
		quantum. All other ag. requirements were mandated through administrative rules. In a time when Hawaii is conscious of its food dependency and ag lands are a precious commodity, it seems inappropriate to me to be limiting agriculture parcels to one acre or less. If that is the
7	Subsistence Ag	case, DHHL is issuing a residential lease. Subsistence farming can take place on residential lease. DHHL should not be allowed to reduce its agricultural wait list by issuing 1 acre residential leases. In my opinion, renaming a 1 acre parcel "subsistence ag" is a poor solution to addressing the ag wait list. We need lands to grow food and increase Hawaii's food sustainability.

200	C. beister an Am	Oahu could be happy with 1ac. We want larger acreage -for whole family. Has to be a way to ensure neighborhood's desire for lifestyle is recognized in plan. Develop rules by island.
	Subsistence Ag Subsistence Ag	Grew up family of 13 -1ac. Raised pigs, 1 cow, lo'i, fisherman, had water.
	Subsistence Ag	Need 3-5 acres for subsistence.
	Subsistence Ag	Min 2 acs.
	Subsistence Ag	Remove farm plan +2/3rd from any Ag lessees less than 5 acs.
	Subsistence Ag	Subsistence -needs more acres
	Subsistence Ag	If small scale Ag-need 2+ acres.
	Subsistence Ag	If do 2 acs -not fair If no need farm plan.

301	Subsistence Ag	When? Kicking off. 793 ag land idle
	Subsistence Ag	Waiohuli -makai - all Ag list come work got place/land for subsist. Ag.
	Subsistence Ag	How much Ag land on Maui.
	Subsistence Ag	What happened to Pulehunui + Keokea.
_	Subsistence Ag	Why can't we open up 5000 acres below Kula + Honokowai
_	Subsistence Ag	Open landbelow Waiohuli
	Subsistence Ag	Proviso- can request additional acs up to 40 acs. (Not prohibited)
	Subsistence Ag	Maui land for Maui residents.
	Subsistence Ag	65 lots/20 familes.

328	Subsistence Ag	Should do businesses, not really re: Ag-paintball.
329	Subsistence Ag	Subsistence lifestyle -so not about doing whatever.
330	Subsistence Ag	To feed just your family -not profit
331	Subsistence Ag	Where water coming from
332	Subsistence Ag	We got on land -Ag lease. No H2O. Only 600 gals. Trying to get this resolved.
333	Subsistence Ag	How is DHHL going to help?
334	Subsistence Ag	No need re-invent rules-county has rules.
335	Subsistence Ag	Loans for subsistence Ag -DHHL.
336	Subsistence Ag	What is time frame difference B/N Ag lots + subsist. Ag lots?
337	Subsistence Ag	Object to this (cuz?) process.
		In designing subsistence-Ag subdivisions and ALL future hoemstead subdivisions, low impact
338	Subsistence Ag	design (LID) should be employed, as appropriate and feasible.
339	Subsistence Ag	County: plan review waiver -to approve house w/approvals.
340	Subsistence Ag	Let us build lot without permits shack, roof over head.
341	Subsistence Ag	Combo 1 area, pastoral area, Ag 1 area, allergies.
342	Subsistence Ag	How does DHHL give out rights to fishing.
343	Subsistence Ag	No res requirement Ag> res/pastoral> res.
		Why required to live on Ag lots? Same reasons -we don't have access to land is still same
344	Subsistence Ag	problem.
345	Subsistence Ag	Allow 2 houses If 2 acres -per county code.
346	Subsistence Ag	Should be allowed to stay in tent.
347	Subsistence Ag	Want to raise my family -who is to say.
348	Subsistence Ag	Need strength-age, not getting younger.
349	Subsistence Ag	Estab water company.
350	Subsistence Ag	Wai - Viable ag
351	Subsistence Ag	Where is water coming from determines viability.
352	Subsistence Ag	Need water
353	Subsistence Ag	Water -bring water down.
354	Subsistence Ag	HHCA sufficient water. CWRM has formula for H2O -use formula to get whole island.
355	Subsistence Ag	Don't reinvent the wheel-mimic Ag lot zoning.
356	Subsistence Ag	Ran both pastoral and Ag together with rules.
357	Subsistence Ag	Some have all the knowledge.
358	Subsistence Ag	Ed. Programs to do -MEO. Help the "4 core" CTAHR
359	Subsistence Ag	Younger generation on land quicker.
360	Subsistence Ag	Animals, plants, + whatever.
361	Subsistence Ag	Not only food -solar power
362	Subsistence Ag	Need viability. More product w/i homestead selll in homestead.
363	Subsistence Ag	How do you give it to the guy that can make it work. You're getting rid of all metrics
		Need money to build -collateralize(?) Bldgs products, recognized by lender. So can buy

		I am not in favor of the creation of one acre or less agricultural lots. Residential lots can be increased to the size of one acre instead. Residential lots already have the occupancy requirement. The "subsistence rural lifestyle" can be achieved in a rural residential community where a home garden can certainly provide subsistence supplementation. Deed restrictions can be modified to include an allowance for potential livestock with reasonable limitations toward the goal of subsistence self sufficiency. It has been my experience that county zoning officials usually defer to the needs of the DHHL within the context of future development. I don't believe that sacrificing the lands designated for agricultural use should be compromised in any way. Furthermore, lender financing is far and away more amenable to residentially designated lots than to lots within an agriculturally designated subdivision. The Federal Housing Administration is primarily set up to accommodate residential financing not agricultural developments throughout the entire nation. Why try and re-invent the wheel when the wheel already exists?
563	Subsistence Ag	For the record, I am in "opposition" and do not support DHHL's Proposed Administrative Rule

719	Subsistence Ag	If the lot size is to small, going to get lots of law suits.
	Subsistence Ag	I have 5 acres now, do I need to use whole lot? No, 2/3.
721	Subsistence Ag	Lot size depends on how many in household.
722	Subsistence Ag	1 acre a good size.
_	Subsistence Ag Subsistence Ag	In waimea our group suggested 2.5 acre. But I think should be 1 acre. But DHHL needs to put in the infrustructure. DHHL can serve more applicants with 1 acre lot size. DHHL will have to go farther and farther out to develop.  1 acre is a good size, get house and can grow.
725	Subsistence Ag	I can grow a lot on an acre, but land get plenty guava. 1-acre lot no animals is fine.
	Subsistence Ag	Do not need 5 acres for this.
	Subsistence Ag	Minimum 5 acres
		Subsistence= I can feed my family and sell left over. I like 2.5 acres. 1 acre too small. 2.5 big
_	Subsistence Ag	enough.
	Subsistence Ag	Before you could get 10 acres, some have 3 acres and 5 acres.
-	Subsistence Ag	If you ask for more lands is that subsistence. No.
	Subsistence Ag	How do you get additioanl acres if you want to farm more.
	Subsistence Ag	This propsal will not affect existing ag-program.
/33	Subsistence Ag	Current ag program max size is 40 acres. Does it require a house.
<b>7</b> 34	Subsistence Ag	If you got a lease, you are taken off lease and can't get more. But DHHL HHCA has provision for additional acreage. DHHL not practicing what you telling them.
735	Subsistence Ag	The density of too many people going into ag will cause problem like spraying.
	Subsistence Ag	DHHL has to better implement its supplemental ag, commercial ag.
737	Subsistence Ag	Workers quarters
738	Subsistence Ag	Can you subdivide existing ag lot? Yes if you do, can you give to your kids if they're not 50%. Yes if they are 25%.
739	Subsistence Ag	DHHL does not promote ag by providing assitance to existing farmers on homestead.
740	Subsistence Ag	We have lots of vacant ag land? How is that land going to be used?
741	Subsistence Ag	Take "subsistence" out and not require house. You should be able to see some cultivation.
	Subsistence Ag	You cannot keep people waiting on the list longer than a year. Not more than 5 years.
743	Subsistence Ag	Residential and ag are two separate animals. Do not combine.
_	Subsistence Ag Subsistence Ag	Right now this is DHHL way of limiting #of lots to one person so more people can get a lot? Yes.  Folks with no ag lots should make imu.
	Subsistence Ag	I can subdivide existing ag lot into 1/2 acre subsistence?
-	Subsistence Ag	Can we take existing ag lots and convert to subsistence.
	Subsistence Ag	Are you going to be allowed to grow medical marijuana?
	Subsistence Ag	Define as home gardening lots
	Subsistence Ag	There are sub-ag lots in Maku'u is 2 acres. That should be the definition

786	Subsistence Ag	What if I have a house not DHHL and I get a subsistence lot, do I have to live there?
787	Subsistence Ag	We want copies of these notes.
788	Subsistence Ag	You need to infrustructure for existing farm lessees.
789	Subsistence Ag	Lets change rule that we have to provide infrustructure.
790	Subsistence Ag	If you can have animals, that's pastoral. Can you mix ag and pastoral lots. We can have pastoral ag lots at 10 acres.
791	Subsistence Ag	If I have a ag lot and I want to give to successor but successor already has a lot, what happens.
792	Subsistence Ag	I don't think subsistence should be done at all. It will impact ag lands. People who will want to farm won't get land.
793	Subsistence Ag	Cannot mix residential with ag.
794	Subsistence Ag	Is management plan required for sub-ag? No.
<b>79</b> 5	Subsistence Ag	Would people on ag-list be awarded subsistence lot? Yes.
796	Subsistence Ag	Requiring residence lots on sub-ag lot disqualifies you from getting another residential lot.

2	Transfer of leases	2) Sale of Vacant Hometead Lots - I think a process should be made to transfer vacant homestead lots to other beneficiaries on the wait list.  1. I do not support any new conditions imposed on lease transfers, including a payment to DHHL as part of the transfer conditions. If you do it for this, you should do this for all lots, improved and unimproved, otherwise it will not be a fair rule. To put one condition on an empty lot and another condition on an improved lot with a house is unfair. With this initiative, you open up a whole can
		of worms. Sometimes, a hands-off approach is better in dealing with these gaping holes in the Hawaiian Homes Act.  2. To a large extent, this problem was created by the inability of DHHL to award leases in a timely manner, the nature of DHHL, and the State and Legislature in not adequately funding DHHL programs. One of the major problems with Hawaiian Homes, especially the Hawaiian Homes Commission, is they have focused more on issues related to those already on the land, such as this issue, and little on getting more Hawaiians on the land. I realize this is a complex issue, especially when DHHL is the 'step-child' of state agencies.
		3. Another major problem is a revolving door of politically-appointed commissioners and chairpersons, many who may not fully understand their mission or being able to clearing prioritize what is really important, and this is just one example. Maybe commissioners need to take a test in how well they understand the Act, and its shortcomings before. I don't have confidence in some of the commissioners who may not know what they're doing and can only do more harm than good for the future of HHL.
		<ol> <li>4. For some of those on the waiting list, purchasing a lease may be the only way they will ever occupy a homestead lot before they pass away. Many also look at the purchase of a lease as the only way to assure that their children can have a homestead.</li> <li>5. The sale of lots may even solve problems when awarded lots are not being utilized by lessees, because the key is utilization of lots. I realize this is a complicated issue, and too many lots are not be utilized for its intended purposes. Market forces will always come into play even with a long-term lease program such as this.</li> </ol>
3	Transfer of leases	6. About 25 years ago, I was not in support of the open transfer of a lease and that conditions needed to be put in place to prevent speculation such as not allowing those who sell a lease to go back on the waiting list. Since then, I've come to learn about the myriad reasons homesteaders transfer their lease. At a meeting of those on the waiting list at a Council for Native Hawaiian
1	Transfer of leases	Sale of Vacant Homestead Lots is an interesting issue because everyone has a stake in this land.  Sometimes I feel that those who've never been given award should be given a small stipend towards living expenses if they are indeed well below the poverty line in their respective counties while they are waiting for an award as long as they meet all other requirements and if and then they get an award then consider the options for agriculture and perhaps a new project. Trailer parks. Why not? I've been to many that were plopped in the backyard for family that couldn't afford anything else. I hope my ohana will remember to perpetuate the good and great in our

	Transfer of leases	(2) At least one-quarter Hawaiian or grandchild, or direct decendent niece or nephew of the lessee.  DELETE (Provided that leases for vacant or undeveloped lots and undivided interests may only be transferred by gift or succession.)  A. Restricting lessees rights to transfer as allowed per the HHCA B. Restricting lessees rights of self determination C. Restricting lessees rights by preselecting "to whom they may be allowed to transfer and ultimately, under what condition" D. Rationalizing lessee realizing unfair gain. 1. All lands are appraised a value by the County 2. For one division of the department to be allowed to use the assessed value to calculate fees for general lease, right of entry, or revocable permit (when finally Implemented) and another division restrict value of the land as a measure for Transfer is double-dealing.  'A'OLE E. The 2001 Farm Task Force Recommendations were approved by the HHC, but DHHL never implemented them, which greatly contributed to interested eligible native Hawaiians searching for opportunities to acquire farm leases. F. Ag lots which were returned to the department were put in the inventory of Land Management Division, instead of being made available to the next applicant on the list.
6	Transfer of leases	I strongly agree that all leases, that were issued on undivided land, should be returned to DHHL, if the lessee is no longer interested. These lands should not be sold by the current lessee for profit. In fact all leases that were issued to undeveloped lands and the lessee has not done anything with the property, (build, plant, farm etc) should be returned to DHHL. If I recall when these lessee were given these lands, they had so many years (3 ?) to complete whatever their goal was? What happened?
7	Transfer of leases	I've advocated for stopping the sale of undivided leases and unimproved lots for many years I strongly support this change to end this type of abuse to our trust.

8	Transfer of leases	Lease Transfer - it is important for DHHL to acknowledge the following facts as they pertain to non gift or successorship transfers leases are being transferred to eligible wait list Hawaiians- urgency and fear grows among families with aging 50%er's due to the time it takes for lease awards. Emotionally, the sale of leases is not acceptable. Realistically, the sale of leases is occurring because people are tired of waiting so they take matters into their own hands. My position on sales is that if DHHL issued leases at an efficient rate, there would be no market for the sales that are occurring. More importantly, it is not clear how DHHL would enforce this rule without amending the HHCA. Successorship relationships are clearly defined but transfers are still allowed between eligible 50% beneficiaries. I am unclear as to how DHHL will enforce sales that take place without disclosure. DHHL has little or no enforcement authority to prevent sales from occurring.
	Transfer of leases Transfer of Leases Transfer of Leases	Sales of Hawaiian Home Lands lots The one issue that is the most difficult is the selling of leases, because any actions that will tighten up the selling of leases should apply to any other transfer, sublease, and sales of lots no matter if its developed or undeveloped land. If the goal of DHHL is to recover their investment in developing lots, they will need to look at all transfer of assets, properties, and profits made of the sale, transfer, and sublease of land. On many general leases or licenses, lessees whether Hawaiian or non Hawaiian are reaping huge profits from these lands and DHHL is benefitting little. I've seen this on Molokai where a licensee was subleasing to the corn companies and reaping huge financial benefits, and DHHL saw little of this. Before implementing new laws on the sales of raw land, DHHL needs to fully understand the ramifications of such a law, and how they may need to implement other laws to gain true benefits from every financial transaction connected to Hawaiian Home Lands parcels.  Should only get what they paid—\$100 Selling for profit is another thing.

283	Transfer of Leases	You change the rule, there's going to be a ripple effect. Let the lessee decide what they want to do with it.
284	Transfer of Leases	There are so many hoops DHHL creates. First the 50% hoop, then the financial qualification.
285	Transfer of Leases	I'm ok with transferring your lot if you have health issue and cannot develop. But you cannit sell and go back on the list. Once you sell you are saying you don't Hawaiian Home Lands.
	Transfer of Leases	My aunty had unimproved lot in Pu'ukapu. DHHL put 0 infrustructure in. She sold it and used \$ to repair her house. Lots sometimes are unimproved because there's no infrustructure.

509	Transfer of leases	As a lessee myself, there are a lot of misconceptions in regards to the genetic testing and selling / transfer of leases I've also heard many complaints about the transfer and selling process., "Why does the process take so long?"; "Is there anything in writing stating the process of selling or transferring my lease? For the most part with the process of selling / transferring leases, there should be a due process stated clearly in writing (like a pamphlet if must) listing the things needed from both the lessee and transferee, etc. it will minimize complaints, etc.
510	Transfer of Leases	Act says "transfer" today we think "sell"should change the language to specify "no financial gain"
	Transfer of Leases Transfer of Leases	If waiting because of DHHL, should move on, but lose your place on the waitlist. If you sell, you don't get back on same place.  No sales.
	Transfer of Leases	Don't sellno
	Transfer of leases	I don't approve with selling of land
	Transfer of leases	Land leases should never be allowed to sell: NEVER
	Transfer of leases	Should not be sale-able. Lease is a lease. No land salesonly leases; borrowed only
5 <b>17</b>	Transfer of leases	Development or/and improvement of lot can be sold based on market value not land but I know that geographic makes a difference. How is this being handled?
	Transfer of leases	Expand to developments as well, but transactions must pass to DHHL as "watch dog"
	Transfer of Leases	No sale. Goes back into the potback to the waiting list
	Transfer of Leases	Can trade but not exchange of money
	Transfer of Leases	Can give it to keiki
	Transfer of Leases	Yes-can transfer to any qualified beneficiary
	Transfer of Leases Transfer of Leases	What about isssuing vacant house?  When people have a house on one side, ag on other side of island-house on both is not allowed
	Transfer of Leases	Solution to homeless problem is multi-occupancy. Hawaiians living on the beach
	Transfer of Leases	Boarded up houses but not being reawarded
527	Transfer of Leases	Cut state out of HHLState is what's messing things up.
	Transfer of Leases	Focus on people who want to live in Waimanalospeed up award process, tell us status, be more effecient
	Transfer of Leases	People not doing that because it takes too long
530	Transfer of Leases	Hire more staff at DHHL to speed up process
531	Transfer of Leases	Increase staffing and increase DHHL presence in Waimanalo. Suggest a Windward officehubs, satellite offices, like HC&C. Go out to community more often. More things like this.
	Transfer of Leases	30 years on the listnever gotten an offer for Waimanalo. Takes too long
	Transfer of Leases	Still selling going onredo the lease with stipulations re: selling
534	Transfer of Leases	What about renting? Doing a care home?
