

DEPARTMENT OF HAWAIIAN HOME LANDS

# Maku'u Regional Plan Update

Regional Plans are a part of the Department of Hawaiian Home Lands' tiered Planning system, and focus at the homestead community and regional level. Regional Plans are prepared through extensive beneficiary engagement and are approved by the Hawaiian Homes Commission. Across the islands, there are a total of 23 Regional Plans; the last Maku'u Regional Plan was adopted in 2010. This update to the Maku'u Regional Plan will include four (4) beneficiary consultations where a vision, community values, and priority projects will be identified. The Regional Planning process is meant to help build capacity and a sense of community, stimulate partnerships that aid the homestead community in reaching their goals, and give beneficiaries an opportunity to work together with DHHL in planning for their future.

## PROJECT TIMELINE

**March - May 2025**

*Project Start  
Background Research  
Homestead Leadership Mtg*

**July 31, 2025**
